

Special Swiss food

Discuss

Have you ever had fondue? If so, do you like it? Do you know where it's from and how people eat it?

Read

Fondue is a Swiss specialty. Swiss fondue was found many centuries ago when there wasn't enough food in the country. The people had to keep their cheese and bread for long periods of time. Both the bread and also the cheese became very hard. But when they mixed the cheese with wine and heated it, it turned into a thick sauce in which they could dip the hard pieces of bread. When the winters were long and hard, often a whole group of families came together to share their meal.

Respond

Pretend your neighbor knows nothing about fondue! Tell them where it is from and how it came about.
